Wing Aero Products

The National Distributor of Aviation Training Materials and Supplies

Dear Wing Aero Customer....

Our company, now in its 39th year, is proud to support you and dealers like you with aviation training materials and pilot supplies that support your schools and your businesses. We pursue a strategy and business policy at Wing Aero that has created an environment where we are **“easy to buy from.”**

As you know, Wing Aero never sells to your retail customers to protect from short circuiting your path to sales and profitability. Our dealer customers nationwide are our most valuable asset. Our customers have come to expect friendly service from every one of us. If you give us an order today, you can expect it will ship today. You can count on sales folks who sit on your side of the table to satisfy your requirements of doing business. After all is said, our customers help us pay our bills and feed our families.

This catalog, much like our last, has separate sections divided by key vendors and product types and function. The pages have color coded tabs to help make finding specific sections easier. This catalog is regularly updated with new product and current pricing. If you would like us to provide you with a printed copy, we'll be glad to do so. There are other ways you can view it:

- It is available as you see it in **“print on demand”** form (in whole or just the pages you need).
- It is available on **flash drive** by request to view contents on your desktop or laptop.
- This catalog is also available at **www.wingaero.com** as a PDF document.

Since its first days, Wing Aero has aligned itself with the largest and the best vendors in the aviation training business. Some of these vendors include **ASA Publications, Jeppesen, Gleim, Avcomm, FAA Charts**, and many more.

John and Nancy Wing began Wing Aero in 1986. Our family-owned company is now carrying on with the second generation at the helm. In all the years of Wing Aero serving our customers, we've never forgotten what is important:

- We constantly strive to be **“easy to buy from.”**
- Your phone call is always answered by a real person, not a machine, by the second ring!
- You can return anything you buy from Wing Aero any time with no restocking charge!
- We ship your order the same day you call.

And most importantly we love our customers and appreciate your calling us again and again.

***Call us any time...we will always be happy you called and be thankful for the business you send our way. There are no minimums when you order.
We appreciate every order, large or small... it all counts!***

Very Sincerely,

Nancy Wing, Kelly Wing Folds, Jonathan Folds

VFR Terminal Area Charts

Terminal Area Charts usually depict the airspace designated as Class B airspace; the Puerto Rico-Virgin Islands Terminal Chart is based on Class C airspace and the Anchorage/Fairbanks Terminal Chart is based on Class C airspace (Anchorage) and a Terminal Radar Service Area (TRSA)(Fairbanks). The information found on these charts, while similar to that found on Sectional Charts, is shown in much more detail because of the larger scale. These charts should be used by pilots intending to operate from airfields within or near Class B airspace, Class C airspace or a Terminal Radar Service Area. Revised every 56 days, except Puerto Rico-Virgin Islands is revised annually.

Other CheckMates

Emergency Substitute Pilot CheckMate ●●●

E.S.P. CheckMate assists the NON-PILOT in controlling the aircraft, reaching help on the radio, and if necessary, landing the aircraft. The graphical format makes it easy and comfortable to follow. E.S.P. CheckMate™ can easily be the difference in the outcome of this most serious type of emergency.
CM-ESP

Mountain Flying Checkmate ●●●

This is a full color, plastic card that is a compilation of the special knowledge required for mountain flying. Competent flying in mountainous terrain requires knowledge far beyond what is taught in standard flight courses.
CM-MF

Surviving the 1st 24 Hours CheckMate ●●●

This clearly details the procedures and equipment that you will need to survive a forced landing and the subsequent 24 hours. The preparation BEFORE a flight can make the difference between surviving or not surviving.

CM-SURVIVE

IFR CheckMate ●●●

IFR CheckMate® will assist you through preflight planning to touch-down on the IFR flight. Whether you are cleared for the complete approach or radar vectored to the FAF, IFR CheckMate® format will help keep the flight business orderly and functional.

CM-IFR

Universal CheckMate ●●●●
